

# Voice Agent Co-Presenter

An AI Assistant for Public Speakers

## Agenda

- Why Use a Voice Agent Co-Presenter
- Core Capabilities
- Speaker and Audience Benefits
- How the System Works
- Live Demonstration Overview

## Core Capabilities

- Generate slide content on request, including facts, visuals, and citations
- Respond to audience questions in real time using predefined knowledge
- Navigate slides hands-free using voice commands
- Offer speaker prompts and transitions during the presentation
- Capture Q&A; interactions for later review

## Benefits for Speakers and Audiences

- Makes presentations more interactive and dynamic
- Reduces the speaker's cognitive load and reliance on notes
- Delivers accurate, on-demand information to the audience
- Enables hands-free operation, enhancing presence and engagement

## How the System Works

- The speaker wears a microphone connected to the voice agent
- The agent uses speech recognition to understand commands or questions

- Requests are classified and routed through a language model
- Responses are displayed on screen or spoken aloud
- The system interacts with slide software and content libraries

## **Live Demo Flow**

- Ask the agent to insert a chart about market trends
- Simulate an audience question and hear the agent's response
- Use voice to move to the next or previous slide
- Trigger the agent to show post-talk resources on screen
